

# Farm Saver® Zinc Fulvate

**LOW PRICE – HIGH QUALITY**

**Zinc chelated with fulvic acid & mannitol.**

Zinc governs the production of auxins – the hormones which determine leaf size. The lower the zinc level, the smaller the leaf and an inadequate solar panel can prove very costly. Farm Saver® Zinc Fulvate addresses zinc deficiencies rapidly and cost-effectively.

## **BENEFITS**

- Zinc positively affects leaf size, protein synthesis and moisture management.
- Fulvic acid and kelp are powerhouse plant growth promoters.
